Dear Valued Customer,

We detected an unusual login attempt on your PayPal account from a new device.  
For your protection, your account has been temporarily limited.  
To restore full access, please confirm your identity immediately:

<https://paypal-account-verification-secure.com>

**If you do not verify within 12 hours, your account will be permanently suspended.**

Thank you,  
PayPal Security Team

### 1. Subject Line:

⚠ Important Notice: Unusual Login Attempt Detected ⚠

⚠ Creates fear about account security.

### 2. Sender Email:

[support@paypal-security.com](mailto:support@paypal-security.com)

Fake domain. Domain [paypal-security.com](https://paypal-security.com) is not official.

The word “PayPal” is written as:

paypal

The last letter is capital “l”, not small “l”.

This is called typosquatting attack.

### 3. Greeting:

Dear Valued Customer

Generic greeting i.e, Refers to da friendly wave.

Not personalized.

### 4. Link Analysis:<https://paypal-account-verification-secure.com>

Fake website domain.

Official PayPal website:

<https://www.paypal.com>

### 5. Psychological Tactics Used:

- Fear of account suspension
- Urgency (12 hours)
- Trust exploitation

### 6. Risk Classification : **!!PHISHING – HIGH RISK !!**

### 7. Simple Explanation:

This email pretends to be from PayPal. It uses a fake domain with similar spelling to trick users into entering login credentials on a fake website.
